

NDM Range - Convection Heaters

Convection Heaters

This versatile and attractive heater can be used in a wide variety of environments, including domestic, work and leisure. It provides silent clean heating that won't dry the air. Heater is IP24 (splash proof) approved and can be installed in a bathroom.

Heaters are supplied with wall mount bracket as well as castor wheels for freestanding.

A Power cord of 1.5m with approved SA plug is supplied.

How it works

Cold air is drawn through the bottom of the heater and warm air is expelled through louvres at the top. There is no risk of heat streaking as the design allows for cooler air to pass behind the heater effectively pushing warm air away from the wall.

How it's made

The heating element is a "X"-shaped aluminium element for durability and/ efficient heating transfer (two power heating settings). A thermostatic limit with auto resetting is fitted for added safety should the heater be covered or blocked. The heater is of pressed steel with a powder coated finish in white.

Specifications

Power	500 Watts	1000 Watts	1500 Watts	2000 Watts
Model no.	NDM-05J	NDM-10J	NDM-15J	NDM - 20J
Product size (mm)	460 x 400 x 90	460 x 400 x 107	595 x 400 x 107	830 x 400 x 107
Carton size (mm)	550 x 450 x 130	550 x 450 x 130	690 x 450 x 130	920 x 450 x 130
Packing gross size (kg)	4.3	4.6	5.5	6.8
Voltage	220 - 240 VAC
